7 Reasons to partner with

Sealcoated pavements have a 20-50% longer lifespan, an enhanced appearance, and a smoother surface than unsealed pavement. We use quality materials and proven techniques for outstanding results.

Crack and joint sealing prevents moisture from penetrating the pavement causing larger cracks and potholes. We attack the issues before they become a liability.

Pavement markings, speed bumps and car stops, ensure your parking lot meets regulations, enhances appeal, and helps control pedestrian and vehicle traffic.

ADA handicap and traffic signs direct people safely around your parking area while meeting ADA requirements.

Restoring and waterproofing concrete parking structures protect against deterioration and water damage to vehicles. Interior concrete floors perform best when joints are properly maintained.

At **Rabine University**, seminars are conducted on a consistent basis in our auditorium and on our 100,000 sq ft pavement R&D parking lot for customers, teammates and partners.

Community is important to *Pavement Solutions*. We strive to improve and support the communities we work in through our nonprofit organization, *Rabine Group Foundation*.
